DIRA Website Content Pack

Companion to the Development Brief. This document supplies the actual words: taglines, mission statement, page copy, and the recognition/testimonial section. Hand this to the dev alongside the brief so he's placing real content, not writing his own.

Everything here is proposed final copy, not a placeholder for an AI tool to rewrite. If anything needs trimming for space, trim it, but don't hand a generic AI writing tool the brief alone and let it invent replacement copy. That's the exact outcome this document exists to prevent.

---

1. Master Tagline and Motto

DIRA's official motto, from the Strategic Plan itself:

> **Dare to Dream. From Ideas to Products.**

Primary tagline for the site's hero section and title tags:

> **Building Africa's digital infrastructure, from Cameroon.**

Use the motto and the tagline together where space allows, motto first, tagline second, they serve different jobs: the motto is the founding spirit, the tagline is what DIRA actually does.

---

2. Mission Statement (About Page)

> DIRA exists to build the digital infrastructure institutions and businesses run on, starting from Bamenda. We design secure systems, custom platforms, and technology services for the organizations that need software they can actually trust, and we extend that same capability to the community around us through DIRA Foundation.

---

3. Homepage Copy

Hero headline:

> Building Africa's digital infrastructure, from Cameroon.

Hero subhead:

> DIRA designs secure systems, custom platforms, and technology services for institutions and businesses across Cameroon and beyond.

Intro paragraph (replaces current filler copy):

> DIRA is a technology company based in Bamenda, registered under OHADA law. We build software that institutions can actually rely on: records that hold up under audit, platforms that handle real transaction volume, and technical guidance from a team that stays accountable for the outcome. In 2026 alone, DIRA organized a three-day technology festival that trained 108 young people and drew over 1,000 attendees, launched Cameroon's first verified housing marketplace, and delivered platform work presented directly to senior government officials.

Service teaser section (three cards, matching the Services page structure in Section 5):

1. **Secure Systems**: Records and verification systems built to resist tampering and hold up under audit.
2. **Custom Platforms**: Software built for organizations managing complex data, transaction volume, or membership at scale.
3. **Technology Services**: Consulting and digital transformation support, from strategy through deployment.

---

4. About Us Copy

Our Story:

> DIRA was founded by Fru Allen-Brian Njimbong, then nineteen and recognized as Cameroon's Best Computer Science Student for the 2024 GCE Advanced Level session. Registered under OHADA law in Bamenda, DIRA started as a small technical team and has grown into a group of ventures: DIRA's core technology and consulting practice, DHUB, DIRA Foundation, and DIRA Content Studio. The team today numbers nine, several of whom joined after training through DIRA's own programs.

What we stand for (replaces the generic Innovation/Partnership/Growth cards):

1. **Named Accountability**: Every engagement is led by a named, credentialed team member, not a general claim. Sensitive work is handled by people who stay

answerable for it.

2. **Government-Tested**: DIRA's work has been presented directly to senior government officials and recognized by regional ministry delegates, not just claimed in marketing copy.
3. **Youth-Built**: DIRA trains the talent it hires. Multiple current team members came up through DIRA's own training programs before joining the company.

The DIRA Group (short version, links through to the full Ecosystem page):

> DIRA is the operating core of a small group of ventures: DHUB, Cameroon's verified housing marketplace; DIRA Foundation, our philanthropic and pro-bono technology arm; and DIRA Content Studio, our media production facility. [See the full group →]

---

5. Services Page Copy

Six cards, each with unique copy, replacing the current six generic, disconnected, partly-duplicated descriptions:

1. **Secure Records & Verification Systems**

> Tamper-evident, fully audit-trailed systems for institutions that need to prove a record wasn't altered after the fact: exam results, financial transactions, membership registers, and public verification data.

2. **Custom Platforms**

> Software built for organizations managing complex data, real transaction volume, or membership at scale. DHUB and SHESA Connect are both built and operated on this capability.

3. **NGO & Community Technology**

> Web development, app development, cybersecurity audits, and visual content for nonprofits and community organizations, delivered through DIRA Foundation.

4. **Content & Media Production**

> Video production, podcast recording, branded social content, event coverage, and professional photography through DIRA Content Studio.

5. **Technology Consulting & Digital Transformation**

> Direct advisory work: system architecture, data protection strategy, and systems

> integration, from planning through deployment. Extended through DIRA's partnership with Dunamis Networks for fintech-grade engagements.

6. **Training & Capacity Building**

> Practical technical training across web development, mobile development, and cybersecurity. DIRA's own hiring pipeline runs through this program.

---

6. Recognition Module (Read the Note Before Using)

This replaces a fabricated-quote "testimonials" section with a structured, factual recognition module. Same visual credibility, real content underneath it.

Section heading:

> Recognition & Engagements

Entry 1

- Photo: Fru Allen-Brian Njimbong with H.E. Paul Tasong, Minister Delegate to the Minister of Economy, Planning and Regional Development (MINEPAT), in charge of Planning
- Caption: *DIRA presents its work, including the SHESA Connect platform, to H.E. Paul Tasong, Minister Delegate at MINEPAT.*
- Quote block: **[Insert Minister Tasong's actual words here. You were present for this, use his real statement, not invented copy.]**

Entry 2

- Photo: Fru Allen-Brian Njimbong with H.E. Félix Mbayu, Minister Delegate to the Minister of External Relations (MINREX), in charge of Relations with the Commonwealth
- Caption: *DIRA's work is presented to H.E. Félix Mbayu, Minister Delegate at MINREX.*
- Quote block: **[Insert Minister Mbayu's actual words here.]**

Entry 3

- Photo: DIRA team with Dr. Bama Irene, Regional Delegate of MINRESI, Northwest Region
- Caption: *Dr. Bama Irene, Regional Delegate of MINRESI, commended DIRA at the closing of DIRA TechFest 2026, calling it one of the most promising technology*

companies she had encountered in Bamenda.

- This one is already a real, documented statement from your own company profile, safe to use in this reported form as-is. If you have her exact words rather than the paraphrase, use those instead in quotation marks.

Entry 4

- Photo: DIRA team with representatives of the MINPMEESA Northwest Regional Delegation
- Caption: *DIRA was recognized at DIRA TechFest 2026 by the Regional Delegate of MINPMEESA, Mr. Ngangjo Cliff, represented by Mr. Ngonejo Gilbert and Mr. Atanga Nelson.*

Design note: keep the same visual format across all four, photo, name and title, one line of factual context, then either a real quote or the reported-statement version. Do not mix invented quotation marks into any entry. A reader can tell the difference between "he said this is a credible company" (marketing copy) and "this platform was presented directly to the Minister Delegate at MINEPAT" (a fact), and the second one is actually harder for a skeptical reader to dismiss, because it can't be waved off as something DIRA wrote about itself.

---

7. Portfolio: SHESA Connect Case Study

The Tasong and Mbayu photos also belong on the SHESA Connect project page, captioned as you specified:

> **SHESA project signing** [Photo of Paul Tasong meeting/signing]

> **SHESA project signing** [Photo of Félix Mbayu meeting/signing]

Case study intro copy:

> SHESA Connect is a full membership platform built for SHESA's alumni network: events, leadership records, project tracking, and a media gallery in one system. It's the largest completed platform engagement in DIRA's portfolio to date, and has been presented directly to senior government officials including Minister Delegates at MINEPAT and MINREX.

---

8. Training Page: One Correction Needed Before Publishing

Current live copy marks every program "FREE!" Confirm with the business side before this goes live: is training free indefinitely, or was that true for the TechFest 2026 cohort specifically? If it's not a standing offer, correct copy:

> Practical technical training across six tracks. Some programs are offered free through DIRA TechFest and community partnerships; contact us for current availability and pricing.

Don't leave "FREE!" live if it isn't actually true anymore, that's the kind of promise a visitor will hold you to.

10. Our Group / Ecosystem Page Copy

Section intro:

> DIRA is the operating core of a small group of ventures, each built to extend the same standard of work into a different part of the community.

DHUB card:

> Cameroon's verified housing marketplace. Search, book, and pay securely, with every listing checked before it goes live. [Explore DHUB →]

DIRA Foundation card:

> DIRA's philanthropic and pro-bono technology arm, providing web development, cybersecurity, and digital support to nonprofits and community organizations across the region. [Visit DIRA Foundation →]

DIRA Content Studio card:

> Video, podcast, and branded content production for DIRA's own ventures and for outside clients. [See our work →]

DIRA TechFest card:

> DIRA's annual flagship event. The 2026 edition trained 108 young people and drew

> over 1,000 attendees to Bamenda. [Visit DIRA TechFest →]

---

11. What I Deliberately Left Out

Per the confidentiality note in the Development Brief, none of the Strategic Plan's revenue targets, valuation figures, or the Dangote benchmark comparison appear anywhere in this copy. That framing is real and internally motivating, but it's forward-looking financial projection, not something a public website should state as fact. If you want a version of the ambition that's safe to say publicly, something like "building toward becoming one of Africa's leading technology groups" carries the spirit without stating a number nobody can verify yet.
